

## WORLD RENEW CHANGING THE STORY OF POVERTY

Compelled by God's deep passion for justice & mercy, we join communities around the world to renew hope, reconcile lives, and restore creation. For nearly 60 years, World Renew has supported community development and transformation.

World Renew embraces a family-centered approach to ending global poverty with food security, peace and justice, economic opportunity, community health, and disaster response. Through this whole-person intervention model, World Renew joins hundreds of thousands of families each year to change the story of global hunger, poverty, and illness.

And thanks to partnerships with local agencies and churches across Latin America, Asia, Africa, and North America, the work of World Renew continues to grow. From disaster response to cultural immersion, World Renew believes in educating and equipping volunteers to better understand, engage, and respond to the story of poverty. When people volunteer with World Renew, they have the chance to deepen their understanding, stretch their thinking, and invest in people who are experiencing distress. Such volunteer experiences change people in ways that may well direct their sense of justice for the whole of their lives. Some will teach English in Mozambique, work towards sustainable urban development in Honduras, or rebuild homes after disasters in Puerto Rico, Texas or North Carolina.

**But, EVERY supporter is a change maker because every donation supports peace and justice.**

Advocating for justice is a powerful agent of change and it is at the centre of all of our work. World Renew was founded on justice. We believe God calls us to pursue that justice for every child, every woman, and every man. Over the years, the actions we have taken to work towards peace have grown in scope and boldness. The work starts with listening to communities, and touch on three central areas of our work:

- **Climate Change:** The effects of a shifting climate are felt most acutely in developing countries like Kenya and Bangladesh. Your support goes both towards prevention and response: advocacy as well as training in sustainable farming of climate adaptable crops.
- **Gender Justice:** When you join in World Renew's work of gender justice, more girls complete their education, remain single throughout childhood, and gain access to leadership development in their own communities.
- **Trafficking Prevention:** Combatting trafficking depends on creating safety at home, educational opportunity, as well as strong community ties. The programming of World Renew engages all three, particularly for women and girls. When you give, they thrive.

World Renew is also deeply committed to working with local partners to maximize the effectiveness of donor support and to ensure that each community has its own strong voice in any change. Last year, World Renew partnered with some 70 organizations in the global south, many of which were small, local grass-roots organizations.

We walk alongside families to change hunger, poverty, and illness in the places of greatest need. We invite you to join with us and help change the story of poverty an injustice.

When you  
change  
a story...

**STORIES** start small.  
A village savings program.  
Access to clean water. 1,000  
days of healthy food to start  
a baby's life. But rarely do  
stories stay small. Because  
when you renew hope in one  
story, you renew hope in  
every life that story touches.  
You renew hope for many.  
One story can change far  
more than you imagine.
